

Embed a sound file using Dreamweaver

Make a new folder for your site and name it sounds.

Find some sound files online. Here are a couple of places, but you can use Google to find more or use a music clip.

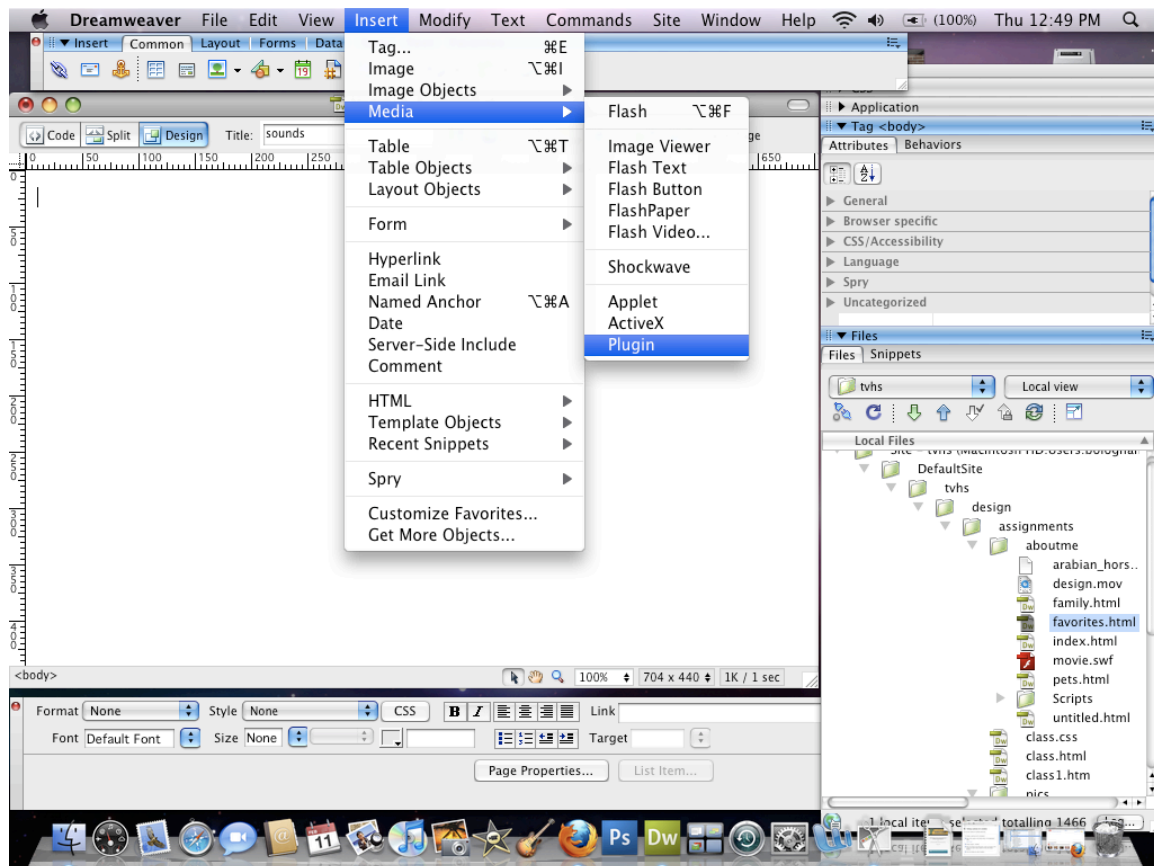

<http://www.partnersinrhyme.com/pir/PIRsfx.shtml>

<http://www.fws.gov/video/sound.htm>

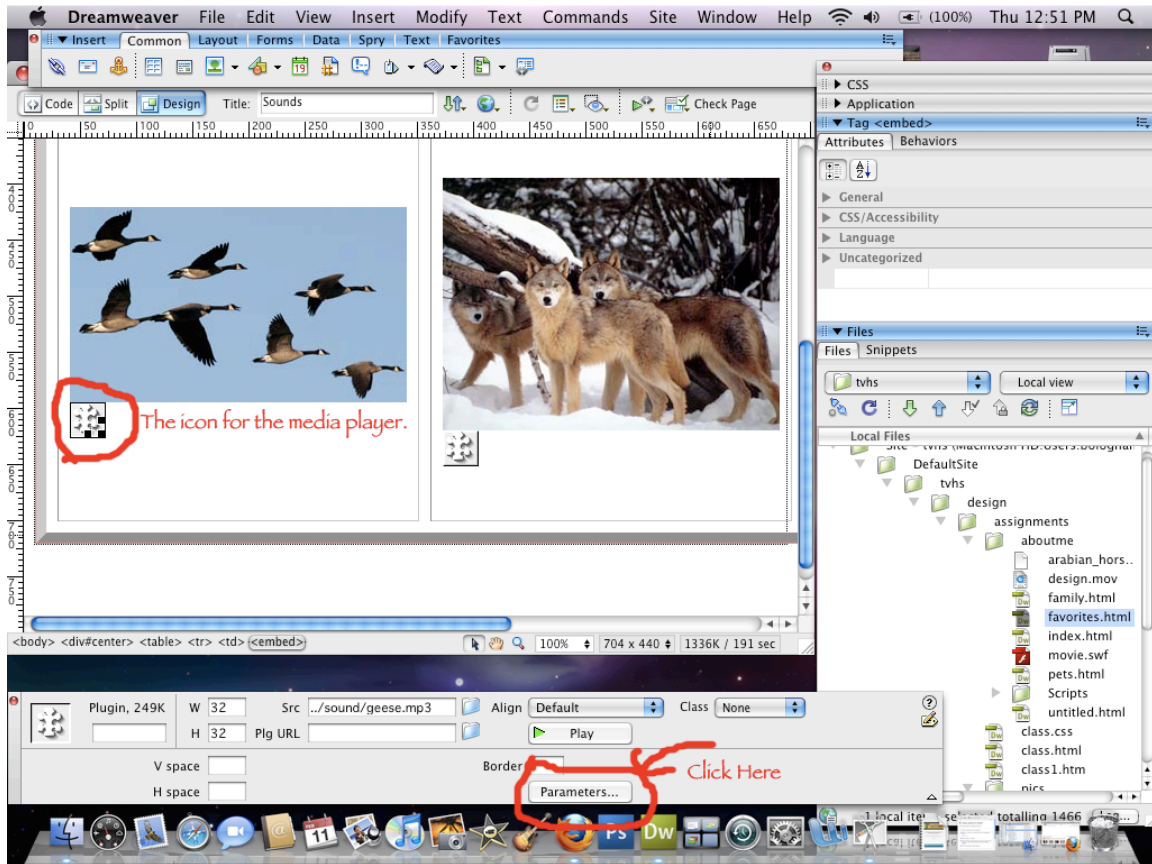

Save your clips to the sound folder.

Open the Dreamweaver page where you will put the sound.

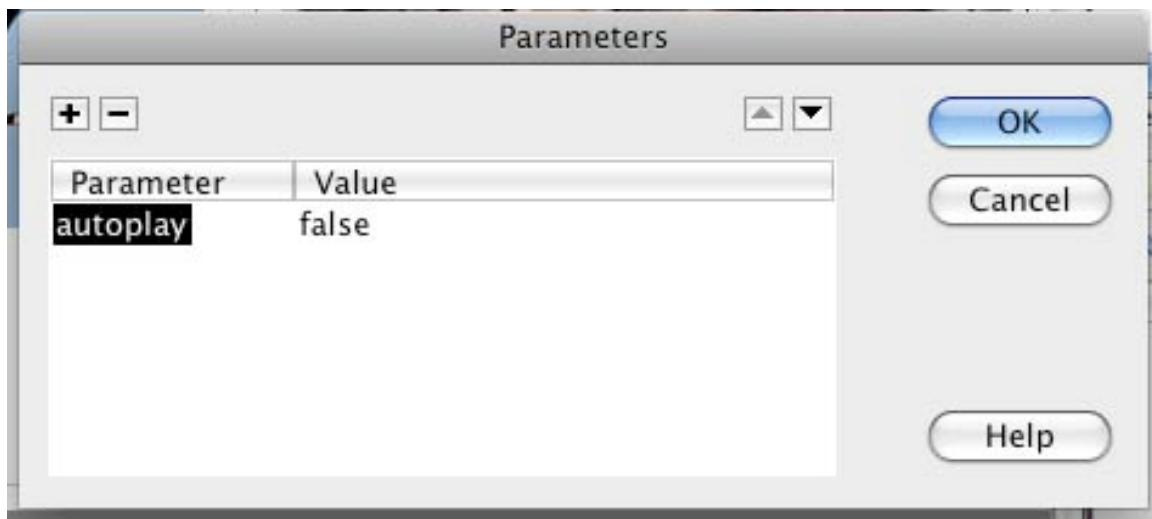

Insert – Media - Plugins

You will now see the icon for the media player.

Click on Parameters.
Type autoplay and use the TAB to go to Value and type false.

Connect the media icon to the sound file, save and open in your browser to test it.
